## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Allowable Subject Matter***

2. This application is in condition for allowance except for the presence of claims 3 and 4 directed to a non-elected without traverse invention. Accordingly, claims 3 and 4 have been cancelled.

## **EXAMINER'S AMENDMENT**

3. The application has been amended as follows: claims 3 and 4 have been cancelled.
4. The following is an examiner's statement of reasons for allowance: claims 1 and 2 are allowed because

a method for modulating data for a polarity alternated pulse width code division multiple access system, the method comprising: multiplying CDMA signals inputted from multiple channels by a mask pattern selected among predetermined mask patterns that have the least peak value; reducing the level number of signals by truncating multiplied CDMA signals according to a predetermined magnitude of levels; converting the level number-reduced signals to pulse width signals to generated modulated signals having a constant level; and alternately switching a starting polarity of the pulses of the modulated signals between "high" and "low"

is missing from the prior art.

Art Unit: 2665

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Padovani discloses in figures 8a-8c and column 11, lines 11-12, various mask patterns tailored for different types of communication channels. Crespo discloses in column 2, lines 41-42, truncating CDMA signals in the time window to obtain pulses. Dent discloses in column 1, lines 23-26, that alternating the polarity of signals is part of a standard CDMA system.

1. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
